Profile

I am interested in algebra and number theory. I have done the Polymath Jr. REU with the topic of Dessin d'enfant (arithmetic approach). I have finished relevant courses including Abstract Algebra, Galois Theory, Number Theory, and Commutative Algebra. I have experience of writing papers and am fluent with latex. My programming skills also includes C++, python, lean4, html & css & javascript.

Published Papers

Research Experience

- **Mitacs Globalink Research Internship**, Université de Sherbrooke May 2025 – Current
  - TBD
- **Independent Study with Professor Vasily Dolgushev**, Temple University
  - TBD Jan 2025 – Current
- **Polymath Jr.**, Online 2024 – 2025
  - Our group gives algebraic and complex analytic approaches to computing an affine model for K_9 dessin, and I draw a visualization of K_9 dessin through the morphism $ \pi_1(P_8/\sim) \to \mathbb{Z}[\zeta_8]/(1+\sqrt{-2})$.
  - I work out the algebraic approaches and draw the visualization. I gave the final presentation of the group work, wrote the algebraic approaches part of the paper (the paper is still in progress), and made the poster that was submitted to JMM 2025. If there is no visa issue, I will go to JMM 2025 and give a talk about that.
- **BICMR AI4MATH**, BICMR(Peking University) Jan Jan 2024 – Feb 2024
  - I collaborate with four students to formalize in lean4 that Algebraic integer of $ \mathbb{Q}[\sqrt{-3}]$ is PID.

- I learn a a lot of knowledge about functional programming and constructing a proof assistant. I lean some basic dependent type theory. Above all, I gain more ability of collaboration and of learning new things quickly.

PRESENTATIONS AND WORKSHOPS

- **JMM 2025 AMS Special Session on Polymath Jr REU Student Research Session**
  - Dessins_d_enfants_and_complete_regular_maps_presentation
- **JMM 2025 AMS-PME Undergraduate Poster Sessions**
  - Dessin_Equation_JMM_Poster

SCHOLARSHIP

- **Gong Neng Scholarship**

Education

- **Exchange Student Mathematics**, Temple University (tuition free) Jan 2025 – May 2025
- **B.S. Mathematics and Applied Mathematics**, Nankai University Sep 2022 – Jun 2026

RELEVANT COURSEWORK:

- MATH0130 Mathematical Analysis I 100 (Honor Class)
- MATH0083 Advanced Algebra and Analytic Geometry 2-1 (Linear Algebra) 100 (Honor Class)
- MATH0068 Computers, Set Theory and Logic (Mathematical Logic) 91
- MATH0133 Mathematical Analysis II 97 (Honor Class)
- MATH0078 Advanced Algebra and Analytic Geometry 2-2 (Linear Algebra) 92 (Honor Class)
- MATH0097 Ordinary Differential Equations 96 (Honor Class)
- MATH0147 Complex Variable Function II (Complex Analysis) passed (Honor Class)
- MATH0132 Abstract Algebra I 88 (Honor Class)
- MATH0145 Complex Variable Functions (Complex Analysis) 97 (Honor Class)
- MATH0146 Mathematical Analysis III 98 (Honor Class)
- MATH0134 Abstract Algebra II 95 (Honor Class)
- MATH0055 Number Theory 92
- MATH0065 Probability Theory 85 (Honor Class)
- MATH0079 Pointwise Topology 84
- MATH0102 Commutative Algebra 97
- MATH0136 Galois Theory 96
- MATH0151 Real Analysis 81 (Honor Class)
- MATH0162 Lie Groups and Algebraic Groups 90
- MATH0051 Functional Analysis 93
- MATH9100 Topics in Algebra (at Temple, Braid Groups)

- MATH8051 Functions of a Complex Variable I (at Temple)

AUDITING:

- Elementary Algebraic Topology
- Analytic Number Theory

UNDERGRADUATE SEMINAR:

- Geometric Group Theroy Seminar: This seminar uses UTX book Geometric Group Theory An Introduction. I participate in it in the first semester of the sophomore year.
- Algebraic Number Theory Seminar: This seminar mainly uses lecture notes by Hu Yong. I learned many algebraic number theory from the video https://www.bilibili.com/video/BV1Fu41127KW/.
- Quasi-Conformal Mapping and Potential Theory: I use the notes from https://webspace.maths.qmul.ac.uk/b.khoruzhenko/potential_th_notes.pdf.
- Analytic Number Theory Online Seminar: This seminar is conducted by a senior alumna (pursuing master degree at University of Bonn). The main topic is o-minimality and some Tame Geometry.

MINI COURSE:

- Propagation speed of non-linear parabolic equations on Riemannian manifolds by Prof. Alexander Grigor's yan
- Preliminary Arizona Winter School 2024:Symmetries of root systems and local fields (unofficially following the course)

Skills

- C++; python; sage; Wolfram Language; latex(fluent, knows basic programming in tex); postscript(ghostscript); lean4; html & css & javascript; shell(bash).
- Cloud: AWS, GCP

Languages

- English (fluent); French (beginner); Mandarin (native)
