SCHOOL PROJECTS

[BICMR AI4MATH](#): I collaborate with four students to formalize in lean4 that Algebraic integer of $\mathbb{Q}[\sqrt{-3}]$ is PID. I learn a lot of knowledge about functional programming and constructing a proof assistant. I learn some basic dependent type theory. Above all, I gain more ability of collaboration and of learning new things quickly.

SPECIAL SKILLS:

Programming Language: C++; python; latex; lean4; html & css ; bash
